EDUCATION

The Hong Kong University of Science and Technology (HKUST)

09.2022 – Present

Bachelor's Degree in Computer Engineering

(est. 06.2026)

EXPERIENCE

C Kent Group

05.2022 – Present

Full Stack Web Developer

Full-Time

- Architected and modernized multiple SaaS platforms, integrating generative AI features and APIs to automate workflows, modernize legacy systems, and drive better business outcomes.
- Collaborated with the team to create an E-Learning Platform for schools, improving accessibility and engagement for learners by applying my full-stack web development and UX design skills.
- Implemented a task/to-do list system according to a new internal scheduling system to streamline project communication and enhance productivity, leveraging my problem-solving abilities and familiarity with project management tools.
- Demonstrated eagerness to work under pressure and strong communication skills, leading to successful project delivery and positive client relationships through my proactive and interpersonal approach.

HKUST Robotics Team

12.2023 - 11.2025

Software Engineer

Hybrid

- Designed and implemented embedded control systems for robotic applications using STM32 microcontrollers, optimizing code for real-time performance and resource efficiency.
- Developed drivers and middleware to seamlessly integrate various sensors and actuators with the robotic control platform, ensuring reliable and responsive operation.
- Demonstrated strong problem-solving skills in debugging and optimizing embedded software, resulting in improved performance and reliability of the robotic systems.

PROJECTS & ACHIEVEMENTS

GDGOnCampus Hackathon

03.2025

Mobile App Engineer

- Developed an "Intelligent E-Service Orchestration for the Next Generation of Digital Governance" utilizing a multi-agentic architecture.
- Integrated CrewAI to facilitate Agent-to-Agent (A2A) interactions, enabling autonomous task delegation and backend execution.
- Managed the Flutter frontend framework, seamlessly connecting the UI with AI agents to orchestrate complex tool calling and user requests.

Kubuqi Desert Sustainable Development Proposal Competition

11.2023 – 04.2024

Project Engineer of HopeGrove

- *Finalist*, secured an award of \$5,000 HKD** by proposing an innovative Web3 and NFT framework to gamify and promote a unique local tourism experience.

NFT Environmental Conservation Project

11.2023 – 01.2025

Project Executor of HopeCanvas

- Led a 7-person team executing conservation events (clean-ups, workshops) backed by a \$5,900 HKD Hsin Chong Education Fund grant**.
- Developed an NFT creation platform with artists to raise awareness and crowdsource environmental funding.

TECHNICAL SKILLS

Languages: English (Fluent), Cantonese (Native), Mandarin (Fluent), Japanese (Basic)

Content Creation: Canva (Proficient), Adobe PR, PS, LR (Intermediate), AI Generation Image/Video

Data Analytics: Word, Spreadsheet (Intermediate), and SQL

Website Building: HTML & JavaScript, PHP (Backend), Springboot, Tomcat, Java Servlet (Beginner)

Programming Languages: Dart, PHP, JavaScript, TypeScript, Kotlin, Solidity, Python, C#, C++, C (Embedded)

RELATABLE EXPERIENCE

Built a 4.5' Unmanned Aerial Vehicle (UAV) and automated its workflow by ROS

05.2026

Final Year Project

- Successfully landed on a floating motorboat with carrying payload by algorithm
